

BMW

BMW (Bayerische Motoren Werke AG) was founded in 1916 in Munich, Germany. The company initially manufactured aircraft engines during World War I. After the war, BMW began producing motorcycles and later entered the automobile industry in 1928. Over the years, BMW became known for its high-quality engineering, luxury vehicles, and performance-oriented cars. Today, BMW is one of the world's leading automobile manufacturers, producing luxury cars, motorcycles, and electric vehicles under the BMW, MINI, and Rolls-Royce brands.

BMW motorcycles

BMW Motorcycles, sold under the BMW Motorrad division, are known for their quality, performance, and advanced technology. BMW introduced its first motorcycle, the BMW R 32, in 1923. Today, BMW Motorrad produces a wide range of motorcycles, including sport, touring, adventure, and roadster models, and is recognized as one of the leading premium motorcycle manufacturers in the world.

BMW's First Motorcycle

BMW's first motorcycle was the BMW R 32, introduced in 1923. It was designed by Max Friz and featured a 494 cc two-cylinder boxer engine. The R 32 was notable for its shaft-drive system, which was more reliable and cleaner than chain drives used by

many motorcycles of that era. Its innovative design laid the foundation for many future BMW motorcycles.
